## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 39-43 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Specification (section 083) disclose that "contacts 915 arranged in a ball grid array" Electrical contacts 915 are, as it follows from Fig. 9a, not necessarily should be ball grid contact . They could be, for example contact pads or "any suitable connector" (Specification, p. 11). The original specification does not present a description of balls being a portion of the adapter.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 34-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Baltz et al.

With regard to claim 34 Baltz et al (US 6,469,906) disclose a transceiver adapter comprising:

Art Unit: 2833

a substrate (102), including first electrical contacts ( contacts communicating with 409; col. 3, lines 62-65) thereon for electrically contacting a transceiver; and

second electrical contacts (104) along at least one edge of said substrate for electrically contacting a printed wire assembly.

With regard to claim 35, Baltz et al disclose that said second electrical contacts are finger-shaped

With regard to claim 36, Baltz et al disclose that said first electrical contacts are on a first side of said substrate and wherein said second electrical contacts are on a second side of said substrate.

With regard to claim 37, Baltz et al disclose that said second electrical contacts are arranged in a linear array.

Claims 34-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Hussain et al.

With regard to claim 34 Hussain et al (US 6,344,684) disclose a transceiver adapter (16) comprising:

a substrate (16), including first electrical contacts (20) thereon for electrically contacting a transceiver (14); and

second electrical contacts (28) along at least one edge of said substrate for electrically contacting a printed wire assembly.

With regard to claims 35, 40, Hussain et al disclose that said second electrical contacts are finger-shaped.

With regard to claims 36, 41, Hussain et al disclose that said first electrical contacts are on a first side of said substrate and wherein said second electrical contacts are on a second side of said substrate.

Art Unit: 2833

With regard to claims 37, 42, Hussain et al disclose that said second electrical contacts are arranged in a linear array.

With regard to claims 38, 43, Hussain et al disclose (Fig. 4) that said second electrical contacts are along at least two edges of said substrate.

With regard to claim 39, Hussain et al disclose (Fig. 4) that said first electrical contacts are a ball grid array.

### ***Response to Arguments***

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexander D. Gilman whose telephone number is 571 272-2004. The examiner can normally be reached on Monday-Friday, 10:30 a.m. - 8:00 p.m.

Art Unit: 2833

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula A. Bradley can be reached on 571 272-2800 ext. 33. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
